

Redefining Critical Care

At LifeCare Hospital of Plano, we are redefining the standard of quality in critical care. Our expert physicians and specialized clinical staff treat and serve medically complex patients, who may require long term acute care, with compassion and purpose.

At LifeCare, we're here to help when it matters most. We partner with patients and families to create the most effective medical and physical treatment plan to enable the best journey toward healing.

We treat:

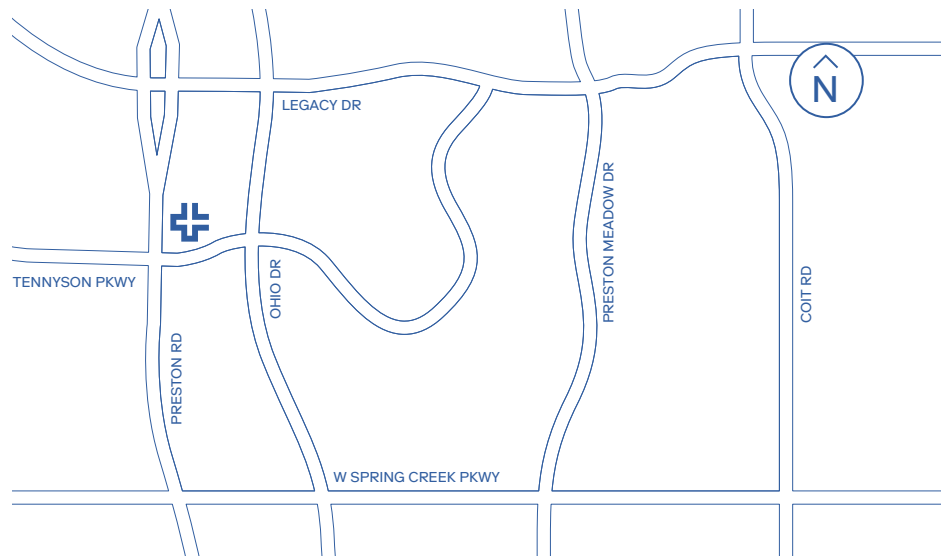

- Ventilator Dependent/Respiratory Failure
- Complex Pulmonary Diseases (COPD)
- Chronic or Non-Healing Wounds
- Cardiovascular-Related Disorders
- Brain/Spinal Cord Injuries
- Multiple Trauma/Multi-System Failure
- Resistant Infections
- Neuromuscular/Neurovascular Disorders
- Cerebral Vascular Accident (CVA)
- Acute and Chronic Renal Disease
- Complicated Fractures
- Joint Replacement Complications
- Post-Surgical Complications
- Sepsis

Specialty Care Services Provided

Early Intervention, Better Outcomes

LifeCare combines early intervention with a collaborative, team-based approach to help patients get back to living their lives. Offering the same in-depth treatments as a traditional Acute Care Hospital, LifeCare provides any necessary critical care to continue with the addition of customized therapeutic treatment in a focused effort, to maximize the patient's recovery potential in a compassionate care environment.

Our Early Intervention and Early Mobilization, patient-centered care has proven to increase the chances for the best possible outcome.
